Score	90%	90%

## PROJECTS

### Ant colony clustering algorithm | June 2019 - June 2020

- Ant colony clustering is data mining concept extract data , store data in this dynamic flow accurately .

## WORK EXPERIENCE

### Capgemini | August 2021 - July 2023

- Associate Engineer:Role & Responsibilities:

As a seasoned Data Analyst with a proven track record, I bring a strong foundation in exploratory data analysis, visualization, and predictive modeling. With a keen eye for uncovering actionable insights, I have successfully translated complex data sets into clear and compelling visual narratives, enabling data-driven decision-making. My proficiency in utilizing tools such as Python, SQL, and advanced analytics techniques positions me to excel in conducting in-depth EDA, creating insightful visualizations, and building predictive models. My commitment to precision and accuracy, coupled with a passion for transforming raw data into meaningful business solutions, makes me a valuable asset in any data-centric environment

## AWARDS AND HONOR

- Capgemini , 2022

Recognized for exceptional dedication to continuous learning, commitment to professional development, and contributions to fostering a culture of knowledge-sharing within the organization.
